

CO-OWNERSHIP

INVESTGOLD's Co-Ownership Plan offers an accessible solution for those who have the desire to own gold coins but who either lack the financial means to do so and/or really would like to diversify in such a way to share in the ownership of a vast variety of gold coins. It offers multiple parties a realistic and affordable way to expand their portfolios by pooling their resources and sharing the costs of an otherwise unaffordable asset, while still enjoying the benefits of the growing coin industry.

Co-ownership is a legal concept where two or more co-owners share the legal ownership of a gold coin. It is a straight forward concept which lets you buy portions of gold coins which is yours for a lifetime.

- The risk of owning only one (1) gold coin and having the chance that the demand in such coin can fall due to popularity in other coins or a sudden oversupply of such coins on the market is being eliminated completely as there would always be a good buyback on at least some of the portions of ones diversified portfolio in owning portions in a vast variety of different gold coins.
- Should you require capital one has the option of choosing only the good performing portions to sell first and do not need to sell ones only expensive coin that might not have done so well at that moment.

Security

- Gold coins in the 'Co-Ownership Plan' are stored in safe custody and INVESTGOLD is responsible for insurance and holding costs of such.
- You have no reason to be concerned about the security of your gold coins.

Ownership

- In most cases one should be able to obtain 100% ownership in a gold coin over a period of time and do not have to spend a large amount of money all at ones which can jeopardise ones cash flow situation.

INVESTGOLD will manage your portfolio from start to finish, including:

- matching you with a silent partner
- setting up partnership agreements
- facilitating the sales process, and managing the partnership.

ADVANTAGES OF CO-OWNERSHIP

Complete diversification in gold coins

- You can now own portions in a vast variety of gold coins with limited amount of money spent on each coin.
- For example R30,000 will allow you to only purchase one (1) or two (2) good gold coins, but with INVESTGOLD's Co-Ownership Plan you will be able to purchase portions in a vast variety of gold coins with the same amount of money.
